

Laboratory Specimen Drop-Off Locations For Providers

For your convenience Beebe Laboratory accepts specimens from providers for processing at multiple drop-off locations throughout Sussex County. All specimens must be accompanied by a laboratory requisition order form and labeled with patient's first and last name, date-of-birth, date and time of collection and specimen source. Information on the requisition must match that on the specimen label.

Blood specimens that are not spun must arrive within two (2) hours of collection time and at least 30 minutes prior to the site's closing time. Most tests, such as PT INR's can be dropped off at any of our locations. Other coagulation tests, including PTT should only be dropped at the Main Hospital or South Coastal Laboratories. Incomplete specimens will not be accepted without reconciling discrepancies, which can delay patient care and treatment.
